Statements of future events or conditions in this presentation or the subsequent discussion period are forward-looking statements. Actual future results, including financial and operating performance; earnings, cash flow, and rates of return; project plans, timing, costs, and capacities; realization and maintenance of cost reductions, opex savings and structural efficiencies; integration benefits; emissions intensity and absolute emissions reductions; operating performance improvements; maintenance and turnaround activity; implementation and outcomes of carbon capture and storage projects, renewable fuel projects, and other technology efforts; price and margin recovery; dividends, cash and debt balances, capital expenditures; resource recoveries and production rates; and product sales levels and mix could differ materially due to a number of factors including global or regional changes in oil, gas, petrochemicals, or feedstock prices, differentials, or other market or economic conditions affecting the oil, gas, and petrochemical industries and the demand for our products; changes in local, national, or international laws, regulations, and policies affecting our business including with respect to the environment, the development and transportation of our products, taxes, trade sanctions, and actions taken in response to the COVID-19 pandemic; the pace of regional and global economic recovery from the pandemic and the occurrence and severity of future outbreaks; the ability to realize efficiencies within and across our business lines and to maintain cost reductions without impairing our competitive positioning; the outcome and timing of exploration and development projects; reservoir performance; timely completion of construction projects; war and other security disturbances; the outcome of commercial negotiations and impact of commercial terms; actions of competitors and commercial counterparties; actions of consumers and changes in consumer preferences; opportunities for and regulatory approval of investments or divestments that may arise, including satisfaction of conditions precedent under applicable agreements; the outcome of research efforts and the ability to bring new technology to commercial scale on a cost-competitive basis; the development and competitiveness of alternative energy and emission reduction technologies; unforeseen technical or operating difficulties including the need for unplanned maintenance; and other factors discussed here and in Item 1A. Risk Factors of our Annual Report on Form 10-K and under the heading “Factors Affecting Future Results” available through the Investors page of our website at exxonmobil.com. All forward-looking statements are based on management’s knowledge and reasonable expectations at the time of this presentation and we assume no duty to update these statements as of any future date.

Reconciliations and definitions of non-GAAP measures and other terms are provided in the text or in the supplemental information accompanying these slides.
GROWING LONG-TERM SHAREHOLDER VALUE
Progressing plans to improve earnings and cash flow in a lower-carbon future

• Good progress integrating new directors; focus on addressing challenges and growing long-term shareholder value

• Expanded senior management skills and perspective with experienced CFO

• Maintaining discipline as market recovers

• Continuing to deliver industry-leading operations performance

• Progressing base business improvements
  – Delivering cost reductions
  – Advancing high-return, advantaged projects
  – Executing value-accretive divestments

• Growing opportunities in Low Carbon Solutions business
DEVELOPMENTS SINCE FIRST QUARTER 2021

UPSTREAM
- Higher liquids realizations in-line with market; lower volumes due to seasonal demand and maintenance
- New discoveries in Guyana
- Completed FID for Bacalhau development in Brazil

DOWNSTREAM
- Global demand improving with vaccine roll-out, partially offset by regional outbreaks and lockdowns
- Margins remain below 10-year lows driven by product oversupply and international jet demand

CHEMICAL
- Best-ever earnings driven by Atlantic Basin polyethylene and polypropylene margins
- Margins increased on strong demand, tight industry supply, and shipping constraints
- Reached agreement to sell Santoprene® business to Celanese; anticipated close by year-end¹

CORPORATE
- Debt reduced by $2.7 billion
- Signed two MoUs to progress industrial-scale carbon capture and storage projects

See Supplemental Information for footnotes.
## RESULTS 2Q21 VS. 1Q21

CONTRIBUTING FACTORS TO CHANGE IN EARNINGS
Million USD

- Best-ever quarterly earnings
- Strong reliability and tight supply conditions
- Planned seasonal turnarounds and maintenance in Europe
EARNINGS 2Q21 VS. 2Q20

CONTRIBUTING FACTORS TO CHANGE IN EARNINGS
Million USD

- Total price / margin improvement of ~$6.7 billion
- Demand recovery including absence of economic curtailments and lower refinery sparing
- Higher planned maintenance across all businesses
- Significant structural efficiencies, lower financing costs, and favorable tax items
DISCIPLINED INVESTING AND COST MANAGEMENT

CASH OPEX EXCLUDING ENERGY AND PRODUCTION TAXES
Billion USD

- 1H20: 19.1
- Efficiencies: (1.2)
- Activity / other: 0.8
- 1H21: 18.7

- >$1 billion in structural efficiencies in 1H21 partially offset by increased activity
- On track for $6 billion of structural efficiencies through 2023 versus 2019

CAPEX
Billion USD

- 1H20: 12.5
- Upstream: (3.5)
- Downstream / Chemical / other: (2.0)
- 1H21: 6.9

- 2Q Capex of $3.8 billion with continued spend in Guyana, Brazil, Permian, and Chemical
- Full-year 2021 Capex on track for low end of $16—19 billion range
  - 2H21 increases with higher Upstream and Chemical project spend – consistent with announced plans

Due to rounding, numbers presented above may not add up precisely to the totals indicated. See Supplemental Information for definitions.

</tbody>
</table>

- Increased cash flow due to stronger market fundamentals, supported by improved reliability
- Continuing to deleverage with additional cash
- Debt reduced by ~$7 billion since year-end 2020

Billions of USD. Due to rounding, numbers presented above may not add up precisely to the totals indicated. See Supplemental Information for footnotes.
THIRD QUARTER 2021 OUTLOOK

**UPSTREAM**
- Higher volumes due to reduced planned maintenance
- U.K. North Sea sale expected to close by year-end, subject to regulatory and third-party approvals

**DOWNSTREAM**
- Continuing demand improvement with economic recovery
- Lower planned turnarounds and maintenance

**CHEMICAL**
- Some easing in tight supply / demand balance
- Lower planned turnarounds and maintenance

**CORPORATE**
- Corporate and financing expenses expected to be ~$600 million
- Continued progress in deleveraging
MARKET ENVIRONMENT

Prices and margins continue to improve

PRICES / MARGINS
2010—2021

- Crude and natural gas markets improved with demand recovery
- Downstream margins remain below 10-year historical ranges driven by product oversupply and weak international jet demand
- Strong chemical margins driven by continued tight industry supply in North America and Europe

Crude\(^1\) ($/bbl)
Natural gas\(^2\) ($/mbtu)
Downstream margins\(^3\) ($/bbl)
Chemical margins\(^4\) ($/tonne)

See Supplemental Information for footnotes.
CHEMICAL MARKET ENVIRONMENT

Strong demand and tight near-term supply driving increased margins

POLYETHYLENE INDUSTRY MARGINS\(^1\)

% indexed to 1Q19

- Resilient demand for key Chemical products
  - Increased packaging and hygiene demand
  - Strong recovery in automotive and durable applications
- Near-term tight supply conditions underpin high margins
  - Industry reliability and significant weather events
  - Shipping constraints amplify supply / demand imbalances
- ~70% of ExxonMobil polyethylene capacity located in North America and Europe

See Supplemental Information for footnotes.
INDUSTRY-LEADING CHEMICAL EARNINGS

Favorable long-term competitive position through advantaged investments and performance products

QUARTERLY EARNINGS¹
Billion USD

• Diversified product portfolio enables value capture across wide range of market environments

• Advantaged feed and integration delivered ~$1.4 billion in earnings in 1H21

• Structural efficiencies supporting ~$1 billion cost reduction by year-end²

• Recent project investments delivering above plan with ~$0.6 billion earnings in 1H21³

See Supplemental Information for footnotes and definitions.
COMMITTED TO SUSTAINABLE CHEMICAL GROWTH

Performance products offer customer choices for lower emissions and improved efficiencies

- Performance products meet evolving societal needs
  - Plastics with lower lifecycle GHG emissions and improved downgauging
  - Vehicle lightweighting for improved fuel efficiency
  - Advanced recycling of circular polymers at scale

- Investments increase portfolio value by growing performance products
  - Leveraging integration, scale, technology, and advantaged feed

See Supplemental Information for footnotes and definitions.
FUTURE INVESTMENTS DELIVER **ROBUST RETURNS**
Advantaged investments strengthening integrated manufacturing platforms with upgraded product mix

**MARGIN IMPROVEMENT AND HIGH-VALUE PRODUCT GROWTH**

~$4 billion

New projects annual earnings potential

30% return\(^1\)

1. Return on investment
2. Potential for earnings growth
CONTINUING TO GROW PERMIAN VALUE
Performance improvements delivering free cash

• 2Q volumes 400 Koebd
  – Up ~50 Koebd versus 2Q20 excluding curtailments

• Continued performance improvement
  – Industry-record 12.5k lateral ft well in 12 days\(^4\)

• 2Q record-low flaring intensity, down 30% vs. 2020
  – 1Q industry performance\(^5\)

• Pace of investment set by objective to:
  – Maintain positive free cash
  – Deliver industry-leading capital efficiency
  – Achieve double-digit returns at <$35/bbl

See Supplemental Information for footnotes and definitions.
ADVANTAGED DEEPWATER DEVELOPMENTS
Exploring and progressing developments in high-return basins; >10% return at <$35/bbl

Guyana
- New discoveries at Uaru-2, Longtail-3, and Whiptail
- Low-cost developments remain on schedule:
  - Liza Phase 2 FPSO in Guyana during 4Q21
  - Payara on schedule for 2024 start-up
  - Progressing Yellowtail towards FID; 2025 start-up
- Six active rigs; exploration, appraisal, development

Brazil
- Bacalhau FID in 2Q21
  - 220 Kbd, on schedule for 2024 start-up
### CARBON CAPTURE AND STORAGE

<table>
<thead>
<tr>
<th>Year</th>
<th>Project</th>

</thead>
<tbody>
<tr>
<td>2022</td>
<td>LaBarge and Porthos projects¹</td>
</tr>
</tbody>
</table>

- Progressing Gulf Coast initiatives including Houston hub concept
- Imperial Oil founding member of Oil Sands Pathways to Net Zero initiative in Canada
- Signed MoU to study feasibility of CCS hub in Normandy, France
- Joined Acorn CCS project in Scotland

### LOW-EMISSION FUELS

<table>
<thead>
<tr>
<th>Milestone</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>&gt;40 Kbd</td>
</tr>
</tbody>
</table>

- Global Clean Energy partnership for supply of >10 Kbd of advantaged renewable diesel in California
- Completed bio feed co-processing trials; potential for >20 Kbd across refining circuit
- Multiple opportunities to repurpose existing units in U.S. Gulf Coast

### LEADER IN METHANE DETECTION TECHNOLOGY

- Founding member of Projects Astra and Falcon, U.S. industry initiatives to identify continuous methane monitoring solutions
- Utilizing flyover technology to detect leaks across Permian Basin
- Evaluating satellite technologies

See Supplemental Information for footnotes and definitions.
GROWING LONG-TERM SHAREHOLDER VALUE
2022+ plans improve earnings and cash flow in a lower-carbon future

Going forward, plans:

• Deliver industry-leading operations performance
  – Lead in safety and reliability
  – Significantly reduce own emissions

• Maintain discipline
  – Deliver 2023 expense reduction commitments
  – Manage Capex within committed range
  – Rebuild balance sheet capacity

• Further improve base business competitiveness
  – Capture scale and integration benefits of reorganizations to drive further step change in cost and competitiveness
  – Progress competitively advantaged investments
  – Continue value-accretive divestments

• Aggressively grow strategically and financially accretive Low Carbon Solutions Business
THIRD QUARTER 2021 OUTLOOK

- Lower scheduled maintenance positions Downstream for continued market recovery
- Lower planned maintenance activity in Chemical

See Supplemental Information for footnotes.
## RECONCILIATION OF OPERATING COSTS AND CASH OPERATING EXPENSES

</tbody>
</table>

Billions of dollars unless specified otherwise.
Due to rounding, numbers presented above may not add up precisely to the totals indicated.
Forward-looking statements contained in this presentation regarding the potential for future earnings, cash flow, and returns, including statements regarding future earnings potential and returns in the Chemical and Downstream segments, are not forecasts of actual future results. These figures are provided to help quantify for illustrative purposes management’s view of the potential future results and goals of currently-contemplated management plans and objectives over the time periods shown, calculated on a basis consistent with our internal modeling assumptions. Management plans discussed in this presentation include objectives to grow sales of Chemical performance products and to invest in new projects. For this purpose, we assume operations at full capacity and average annual Downstream and Chemical margins as seen over the 2010—2019 time period (see slide 15). These assumptions are not forecasts of actual future market conditions. For this purpose we have assumed future demand growth in line with our internal planning basis, and that other factors including factors management does not control such as applicable laws and regulations (including tax and environmental laws), interest rates, and exchange rates remain consistent with current conditions for the relevant periods. This presentation does not attempt to model potential future COVID-19 outbreaks or recoveries.

Non-GAAP and other measures. With respect to historical periods, reconciliation and other information is provided on page 26 of this presentation and in the Frequently Used Terms available on the Investor page of our website at www.exxonmobil.com under the heading News & Resources for certain terms used in this presentation including operating costs and cash operating expenses (cash opex). For future periods, we are unable to provide a reconciliation of forward-looking non-GAAP or other measures to the most comparable GAAP financial measures because the information needed to reconcile these measures is dependent on future events, many of which are outside management’s control as described above. Additionally, estimating such GAAP measures and providing a meaningful reconciliation consistent with our accounting policies for future periods is extremely difficult and requires a level of precision that is unavailable for these future periods and cannot be accomplished without unreasonable effort. Forward-looking non-GAAP measures are estimated in a manner consistent with the relevant definitions and assumptions noted above. No reconciliation of earnings excluding identified items is necessary for the second quarter as rounded results are the same as GAAP earnings.
Definitions

Cash operating expenses (cash Opex, structural efficiencies, or structural reductions). Cash operating expenses are a subset of total operating costs that are stewarded internally to support management’s oversight of spending over time. This measure is useful for investors to understand the Corporation’s efforts to optimize cash through disciplined expense management. For information concerning the calculation and reconciliation of cash operating expenses see the table on slide 26.

Free cash. Free cash is operating cash flow less capital investment. This measure is useful when approximating contributions to cash available for financing activities, applied to the Upstream business.

Operating costs (Opex). Operating costs are the costs during the period to produce, manufacture, and otherwise prepare the company’s products for sale – including energy, staffing, and maintenance costs. They exclude the cost of raw materials, taxes, and interest expense and are on a before-tax basis. While ExxonMobil’s management is responsible for all revenue and expense elements of net income, operating costs, as defined above, represent the expenses most directly under management’s control, and therefore are useful for investors and ExxonMobil management in evaluating management’s performance. For information concerning the calculation and reconciliation of operating costs see the table on slide 26.

Performance product. Refers to Chemical products that provide differentiated performance for multiple applications through enhanced properties versus commodity alternatives and bring significant additional value to customers and end-users.

Project. The term “project” as used in this presentation can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.
Definitions

Resources, resource base, and recoverable resources. Along with similar terms, these refer to the total remaining estimated quantities of oil and natural gas that are expected to be ultimately recoverable. ExxonMobil refers to new discoveries and acquisitions of discovered resources as resource additions. The resource base includes quantities of oil and natural gas classified as proved reserves, as well as, quantities that are not yet classified as proved reserves, but that are expected to be ultimately recoverable. The term “resource base” or similar terms is not intended to correspond to SEC definitions such as “probable” or “possible” reserves. The term “in-place” refers to those quantities of oil and natural gas estimated to be contained in known accumulations and includes recoverable and unrecoverable amounts.

Returns, rate of return, IRR. Unless referring specifically to external data, references to returns, rate of return, IRR, and similar terms mean future discounted cash flow returns on future capital investments based on current company estimates. Investment returns exclude prior exploration and acquisition costs.
SUPPLEMENTAL INFORMATION
