

Fact: Over N49 billion provided to fight malaria (2007-2017)

Energy lives here™

Truth: Over 27 facilities around 163 communities benefited so far

ExxonMobil has committed about N49.8 billion to help reduce the impact of malaria. We have partnered with the world's leading organizations on the front lines in the fight against malaria.

Over 48,000 pregnant women received treatment alongside Long Lasting Insecticides Treated Nets (LLITN's) and over 27 health facilities around 163 communities have benefited so far from this initiative.

ExxonMobil has also trained health facility workers on use of Intermittent Preventive Treatment of malaria in pregnancy (ITPp), Rapid Diagnostic Test (RDTs) and Artemisinin-based Combination Therapy (ACT) kits.

We remain committed to the fight against malaria in Nigeria.

Let's work together to keep this door of opportunity open!
