

PORT ALLEN LUBRICANTS PLANT
2230 Highway 1 North
Port Allen, LA 70767

PORT ALLEN LUBRICANTS PLANT

PRODUCTION

Approximately 139 million gallons of finished lubricant and base stock throughput annually

PRODUCTS

Manufactures approximately 95 different lubricants

WORKFORCE

Over 50 full-time and 150 contract employees

PACKAGING

Approximately 275 package combinations are assembled using the following packaging: 55-gallon drum, 1-quart bottle, 4 & 5-quart bottle, 1-liter bottles and 5-gallon pails and bag in a box.

DISTRIBUTION

Lubricants shipped worldwide. Primary distribution points throughout North and South America and the Caribbean. Products are shipped by rail car, tank truck, ISO-containers, flexi-bags, export containers, package trucks and inter-modal.

SAFETY

Awarded OSHA's Voluntary Protection Program (VPP) "STAR" Status in 2005 and continues retaining STAR STATUS through the VPP recertification process.

Since 2015, ExxonMobil's lubricant business has diverted 93% of its waste – more than 50,000 tons – out of landfills annually.

Port Allen Lubricants was one of 14 global sites that contributed to ExxonMobil's "Zero Waste to Landfill" silver validation from independent certification organization UL, making ExxonMobil the world's first petroleum products company to receive such a recognition.

★ Energy lives here.
