CAUTIONARY STATEMENT

• Statements of future events or conditions in this presentation or the subsequent discussion period are forward-looking statements. Actual future results, including financial and operating performance; demand growth and mix; ExxonMobil’s volume/production growth and mix; the amount and mix of capital expenditures; resource recoveries; production rates; rates of return; development costs; project plans, timing, costs, and capacities; drilling programs and efficiency improvements; product sales and mix; dividend and share purchase levels; cash and debt balances; corporate and financing expenses; and the impact of technology, including impacts on capital efficiency, production and greenhouse gas emissions, could differ materially due to a number of factors including global or regional changes in oil or gas prices, differentials, or other market or economic conditions affecting the oil, gas, and petrochemical industries and the demand for our products; reservoir performance; the outcome and timing of exploration and development projects; timely completion of construction projects; war and other political or security disturbances; changes in law or government regulation, including trade, sanctions, tax and environmental regulations; the outcome of commercial negotiations; the impact of fiscal and commercial terms; opportunities for investments or divestments that may arise; the actions of competitors and customers; the outcome of future research efforts; unexpected technological developments and the ability to bring new technology to commercial scale on a cost-competitive basis; unforeseen technical difficulties; and other factors discussed here and under the heading "Factors Affecting Future Results" in the Investors section of our web site at exxonmobil.com. Any forward-looking statements regarding future earnings, cash flows, returns, volumes, new projects, or market strategies are as of the March 6, 2019 Investor Day except as specifically updated on this webcast. All forward-looking statements are based on management’s knowledge and reasonable expectations and we assume no duty to update these statements as of any future date.

• Forward-looking statements in this release regarding future earnings, cash flows, returns, volumes, new projects, market strategies, or key milestones refer to plans outlined at ExxonMobil’s Investor Day held on March 6, 2019, except for our second quarter outlook on pages 11 through 13. The growth figures presented at that meeting are not forecasts of actual future results but were intended to help quantify future potential and goals of management plans and initiatives. See the complete March 6, 2019 presentation available in archive form (including the Cautionary Statement and Supplemental Information included with that presentation) on the Investors page of our website at www.exxonmobil.com for more detailed information. That material includes a description of the assumptions underlying these potential growth estimates including a flat real oil price of $60 Brent per barrel (which is not intended to be a forecast of future prices), downstream and chemical margins consistent with 2017 levels, and future gas prices consistent with our internal company plans, as well as a reconciliation of adjusted 2018 earnings used as a baseline.
# First Quarter 2019 Key Messages

*Billions of dollars unless specified otherwise*

---

- Projects on track; continued exploration success
- Year-over-year liquids growth driven by Permian
- Solid operating performance in a challenging margin environment
- North American crude differentials significantly narrowed
- Long-term fundamentals remain strong despite near-term supply and demand imbalances
- Earnings in line with market drivers
  - Includes negative ($0.04) per share impact from impairments

---

1. Includes Proceeds Associated with Asset Sales; see slide 10 for reconciliation and Supplemental Information for definition
2. See Supplemental Information for reconciliation and definition
# DEVELOPMENTS SINCE FOURTH QUARTER 2018

## UPSTREAM
- Liquids realizations up with improved Western Canadian differentials
- Global gas realizations declined with LNG lag effect
- Permian production increased by 19% to 226 koebd
- Three additional discoveries in Guyana (Haimara, Tilapia, Yellowtail)
- Other portfolio developments: Cyprus discovery, Golden Pass FID, and Papua LNG expansion agreement

## DOWNSTREAM
- Refining industry margins weakened due to excess gasoline supply
- North American differentials narrowed with increased takeaway capacity and production curtailments
- Successfully completed high level of scheduled maintenance
- Reached FIDs for Singapore resid upgrade, Fawley hydrofiner, and Beaumont light-crude expansion

## CHEMICAL
- Margins remained challenged with supply length from recent capacity additions
- Higher volumes supported by growing demand
- Beaumont polyethylene expansion on track to start up by third quarter 2019
- Reached FIDs for Baton Rouge polypropylene, Baytown Vistamaxx and linear alpha olefins
UPSTREAM VOLUMES

1Q19 vs. 4Q18

- Volumes in line with fourth quarter
- Permian production increased by 36 koebd (19%), more than offset by Kearl and natural field decline
- Other includes higher European seasonal gas demand partly offset by lower entitlements

1Q19 vs. 1Q18

- Liquids increased by 5%
- Permian volumes grew by 126 koebd (126%), partly offset by natural field decline
- Absence of PNG earthquake and lower downtime / maintenance in Canada and Qatar
- Other includes lower European seasonal gas demand with warmer weather and divestment impacts

**See Supplemental Information.**
EARNINGS 1Q19 VS. 4Q18

- Upstream: fewer sales days, higher maintenance, and absence of various one-time items
- Downstream: narrowed differentials, lower refining margins, absence of asset sales, and derivative impacts
- Chemical: absence of favorable tax item, and continued margin weakness

<table>

</table>
DOWNSTREAM EARNINGS 1Q19 VS. 4Q18

• Absence of Germany and Augusta asset sales
• Narrowed North American differentials
• Lower industry refining margins with excess gasoline supply and tightened clean / dirty spread
• Relative change in mark-to-market derivatives impacts

DOWNSTREAM MARGIN ENVIRONMENT

INDUSTRY REFINING MARGINS
$/Bbl

- Industry refining margins amongst lowest in last 10 years
  - Low-conversion margins supported by fuel oil and distillate
  - High-conversion margins challenged with weak gasoline, naphtha, and LPG crack spreads

Source: S&P Global Platts Analytics, equal weighting USGC (Maya – Coking), NWE (Brent – Catalytic Cracking), Singapore (Dubai – Catalytic Cracking)
Polyethylene (PE) demand remains strong, growing at 3.3% per year, 1.2 times global GDP

Industry PE capacity additions exceeding demand growth

Industry PE margins reflect cyclical nature of chemical business

Source: IHS Markit, Platts, public announcements, EM estimates
**FIRST QUARTER 2019 CASH PROFILE**

- Working capital release driven by favorable seasonal payables balances
- Additions to PP&E in line with 2019 capex guidance
- Utilized strong financial capacity to progress advantaged investments
- Announced dividend increase of 6%, representing the 37th consecutive annual increase

### CASH FLOW

**Billion USD**

- 2018 Cash Flow: 3.0
- Cash Flow from Operating Activities: 8.3
- Proceeds Associated with Asset Sales: 1.3
- PP&E Adds / Investments and Advances: (5.9)
- Shareholder Distributions: (3.5)
- Debt/Other Financing: 2.6
- 2019 Cash Flow: 4.6

$2.5B Free Cash Flow

1. See Supplemental Information for reconciliation and definition
2. Includes PP&E Adds of ($5.2B) and net investments/advances of ($0.7B)
<table>
<thead>
<tr>
<th>Category</th>
<th>Outlook</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>UPSTREAM</strong></td>
<td>Lower gas volumes due to seasonal demand</td>
</tr>
</tbody>
</table>
| **DOWNSTREAM** | Industry refining margins recovering with maintenance and stronger gasoline demand  
                 North American crude differentials expected to remain near first quarter 2019 levels  
                 High level of scheduled maintenance – similar to first quarter |
| **CHEMICAL**   | Supply length continues to impact margins                                 |
|                | Significant scheduled maintenance in second quarter                     |
| **CORPORATE**  | Corporate and financing expenses expected to be $700 million - $900 million |
Second Quarter 2019 Outlook

- Gas demand in Europe highly seasonal, driven by weather
- Second quarter gas demand lower by an average of 200 koebd relative to first quarter
SECOND QUARTER 2019 OUTLOOK

- Heavy turnaround activities in 2018/19, including preparation for IMO 2020
- Impact from Downstream scheduled maintenance similar to first quarter
- Chemical scheduled maintenance significantly higher in second quarter

**Downstream Scheduled Maintenance Earnings Impact**

Growth plans on track

Strong Permian growth continues; additional discoveries in Guyana extending upside

Six projects sanctioned across Downstream and Chemical

Long-term fundamentals remain strong

Integrated business model delivering value
On plan to reach 1 Moebd by 2024.

Advancing unique development across Midland and Delaware:
- Extensive well inventory supports production profile
- Operating 46 rigs in Permian, expect 55 by year-end

Processing and take-away build-out on track:
- Construction activities progressing
- Southeast New Mexico central delivery point planned by year-end
- Delaware fields to Wink terminal expected by mid-year

1 Potential production as communicated at 2019 Investor Day
Permian includes Midland and Delaware basins

See Supplemental Information
• Adding to recoverable resource with successful exploration

• Yellowtail-1 well marked 13th discovery on Stabroek block
  – Fifth discovery in Turbot area; major development hub, similar to Liza
  – Adds to estimated 5.5 Boeb recoverable resource

• 2019 plans include additional exploration wells and drilling on Hammerhead and Ranger

• Liza Phase 1 development startup by 1Q20

• Expect Liza Phase 2 FID soon, subject to government and regulatory approvals
SINGAPORE RESID UPGRADE

- Leverages proprietary process and catalyst technology to upgrade resid to higher-value products
- Refinery and chemical plant integration provides project synergies
- Moves Singapore to top quartile for refining profitability
- Strengthens position as lowest supply cost of any liquids cracker in Asia
- Planned start-up in 2023
FAWLEY HYDROFINER

Project scope
- High-pressure hydrotreater
- Hydrogen plant
- Logistics enhancements

- Increases production of higher-value products
- Strengthens integration with chemical operations
- Improves yield to better align with local market demand
- Leverages logistics into Greater London area and Heathrow
- Planned start-up year-end 2021
OPTIMIZING VALUE CHAIN

- Extensive network of assets spanning full value chain
- Leveraging asset-backed trading to maximize value as products move through value chain
- Optimizing investment in existing assets and capturing value from market disconnects

3.8 MBDOE net production
4.7 MBD refining capacity
250 MB tankage
5,400 miles of pipeline
165 terminals
145 vessels in EM service
19k rail cars
20k branded retail sites
Leveraging competitive advantages to grow significant shareholder value

Progressing strongest set of opportunities since Exxon and Mobil merger

Strengthening base while investing across full value chain

Capturing further upside opportunities and executing plans
DOWNSTREAM MARGIN ENVIRONMENT

- North American differentials narrowed with increased takeaway capacity and production curtailments
- Industry margins declined as mogas oversupply more than offset strong distillate demand
- Tightened clean / dirty product spreads; high-conversion refineries pressured by weak gasoline cracks and strong heavy-crude prices
UPSTREAM EARNINGS 1Q19 VS. 4Q18

- Improved North American differentials more than offset lower crude and natural gas prices
- Higher maintenance and fewer sales days negatively impacted volumes
- Absence of various one-time items, partly offset by lower exploration expense

<table>
<thead>
<tr>
<th>EARNINGS</th>
<th>Million USD</th>
</tr>
</thead>
<tbody>

<td>(290)</td>
</tr>
<tr>
<td>Other</td>
<td>(200)</td>
</tr>
<tr>
<td>1Q19</td>
<td>2,876</td>
</tr>
</tbody>
</table>
UPSTREAM EARNINGS 1Q19 VS. 1Q18

• Lower crude prices partly offset by higher gas realizations

• Higher volumes with Permian growth and absence of downtime / maintenance, partly offset by lower European seasonal gas demand

• Other includes current quarter impairments and absence of asset sales, primarily Scarborough
DOWNSTREAM EARNINGS 1Q19 VS. 1Q18

- Lower industry refining fuels and basestocks margins
- Relative change in mark-to-market derivatives impacts
- Higher scheduled maintenance, partly offset by improved reliability
- Other includes yield improvements, new projects, and portfolio optimization, partly offset by higher expenses

<table>
<thead>
<tr>

<td>(256)</td>
<td>1Q19</td>
</tr>
</tbody>
</table>
• Lower realizations outpaced lower feed costs, with continued supply length

• Lower expenses with completion of scheduled maintenance

• Other reflects the absence of favorable one-time tax item
CHEMICAL EARNINGS 1Q19 VS. 1Q18

- Lower margins due to lengthening supply
- Higher polyethylene volumes supported by new projects
- Unfavorable forex mainly due to weaker Euro
- Other items include higher expenses for new assets

\(^2\) See slide 32 for definition
SUPPLEMENTAL INFORMATION

Definitions

**Free cash flow.** Free cash flow is cash flow from operations and asset sales less additions to property, plant and equipment, and additional investments and advances, plus other investing activities, including collection of advances. This measure is useful when evaluating cash available for financing activities, including shareholder distributions, after investment in the business.

**Project.** The term “project” as used in this presentation can refer to a variety of different activities and does not necessarily have the same meaning as in any government payment transparency reports.

**Resources, resource base, and recoverable resources.** Along with similar terms used, these refer to the total remaining estimated quantities of oil and natural gas that are expected to be ultimately recoverable. ExxonMobil refers to new discoveries and acquisitions of discovered resources as resource additions. The resource base includes quantities of oil and natural gas that are not yet classified as proved reserves, but that are expected to be ultimately moved into the proved reserves category and produced in the future. The term “resource base” is not intended to correspond to SEC definitions such as “probable” or “possible” reserves. The term “in-place” refers to those quantities of oil and natural gas estimated to be contained in known accumulations and includes recoverable and unrecoverable amounts.

**Returns, investment returns, project returns.** Unless referring specifically to ROCE, references to returns, investment returns, project returns, and similar terms mean discounted cash flow returns based on current company estimates. Future investment returns exclude prior exploration and acquisition costs.
