

**Vendor to provide the following information** (add columns and/or create in MS Excel as needed):

<b>General Requirements</b>		
<b>Vendor Name/ Rig Name</b>		
<b>Current Rig Status and location.</b>		
<b>Flag state and Class of Rig</b>		
<b>Please provide a list of deviations to the IMO MODU code</b>		
<b>Plans prior to desired start date (operating or stacked, location).</b>		
<b>If stacked or planned to be stacked, summary of maintenance program and crew retention program.</b>		
<b>Does the proposed rig have a current valid Certificate of Fitness for working offshore NL, Canada?</b>		
<b>Operating history offshore NL, Canada, if any.</b>		

<b>Rig Specifications</b>		
<b>What is the drilling fluid storage volume? Can the rig be used with an independent mud/brine system?</b>		
<b>Dynamic Positioning Class / # of Thrusters</b>		
<b>Is the rig zero-discharge compliant?</b>		
<b>Is there a drains treatment system and Oil in Water measurement system as part of treating drains fluid?</b>		
<b>Does the rig have a 6 or 7 ram 15k psi BOP (provide basic information such as BOP manufacturer, number of BOP stacks on rig, ability to outfit a test ram, etc.)?</b>		
<b>Capable of dual activity? Other offline capabilities?</b>		
<b>Number of ROVs able to be accommodated?</b>		
<b>Riser tensioner system specifications and description?</b>		
<b>Water Depth Capability</b>		
<b>Is there a MUX Line Tensioner system on the rig?</b>		
<b>Drill string motion compensator system specifications?</b>
